ESHA KUMAR

eshakumar.98@gmail.com | +1 (603) 349-0442 | https://www.linkedin.com/in/eshakumar1998/

Product Manager with 5+ years of experience across IAM and cybersecurity, owning product strategy and roadmaps for enterprise security solutions. Experienced in identity-aware access and translating complex security requirements into scalable, user-friendly products.

EDUCATION

DARTMOUTH COLLEGE, Hanover, New Hampshire, USA ***Sept 2023 - Nov 2024***
Master of Engineering Management | Product Management Track | Thayer Scholarship Recipient | Graduate School Council Member

VELLORE INSTITUTE OF TECHNOLOGY, Vellore, Tamil Nadu, India ***July 2016 - June 2020***
Bachelors of Technology in Information Technology | Special Achiever Award for academic and extracurricular excellence

RELEVANT WORK EXPERIENCE

Product Manager, Privileged Access Management (PAM) | **HCA HEALTHCARE**, Nashville, Tennessee, USA ***Jan 2025 - Present***

- Built PAM product strategy & 3-year roadmap supporting 44K+ privileged human & non-human identities across multi-cloud environments; established admin account guardrails with IPS aligned to industry standards, balancing security & usability.
- Owned product strategy for a unified PAM self-service portal, consolidating privileged account management, admin access, secret management, and smart card management into one experience; worked with 5 engineers and 2 architects to deliver integrations with Delinea Secret Server, Saviynt, ServiceNow, and Entra ID.
- Led migration of 2K+ SQL SA & root accounts across hospital and corporate divisions from a legacy PAM platform to Delinea by partnering with engineering to modernize credential/session management, reduce fragmentation, and cut infrastructure costs by 17%.
- Analyzed access patterns across 4K+ admin accounts to shape identity-based access policies and PAM onboarding strategies; identified 1,705 accounts used by automated processes and transitioned them to governed non-human identities.
- Built PAM dashboards and leveraged user feedback to drive product decisions, increasing adoption 25% from Q2 to Q3.

Security Product Manager Intern | ICOMPAAS, Santa Clara, California, USA ***June 2024 - Sept 2024***

- Led customer discovery with credit union CISOs to define cloud security and compliance needs, translating insights into a product roadmap for automated vulnerability scanning and actionable remediation; prioritized MVP features and validated value through pilot.
- Improved the vulnerability scanning dashboard and remediation documentation, making security findings easier to interpret and providing clear, actionable steps for customers to address vulnerabilities; created 35 product and remediation guides.
- Shaped pricing and packaging strategy and pitched the product to credit union stakeholders through customer demos; generated purchase interest from 90% of trial users, resulting in consulting engagements.

Senior Product Consultant - Identity & Access Management (IAM) | ERNST & YOUNG, Pune, Maharashtra, India ***Jan 2023 – Aug 2023***

- Defined and executed the upgrade strategy for PingFederate and PingAccess across 20+ servers for a US healthcare client, mapping dependencies and sequencing multi-version upgrades to achieve zero downtime and meet security compliance requirements.
- Automated OAuth 2.0 and SAML 2.0 application onboarding to PingFederate by defining authentication and federation flows and integrating Admin APIs into CI/CD pipelines, reducing manual integration time by 75%.

Senior Analyst - Identity & Access Management (IAM) | SCHNEIDER ELECTRIC, Bengaluru, Karnataka, India ***Aug 2020 – Dec 2022***

- Spearheaded product strategy for a $6.52M passwordless transformation serving 160K+ employees, conducting user research, evaluating FIDO2/PKI-PIV solutions, defining rollout strategy, and driving adoption across diverse enterprise environments.
- Integrated GlobalProtect VPN with Ping via RADIUS, designing adaptive MFA policies for risk-based authentication and remote access.
- Led POCs integrating Ping identity with EcoStruxure Edge Control, exploring identity-based access controls for connected products and Zero Trust security across industrial environments.
- Collaborated cross-functionally on AD rebuild and AWS architecture upgrades, scaling Ping infrastructure to support 50% higher authentication transaction volume while improving latency and Recovery Time Objectives.
- Developed an OAuth 2.0/OIDC framework for administrative access, implemented X.509 authentication for mobile applications, and created adaptive policies to mitigate MFA bombing for remote desktop access.
- Onboarded 300+ applications to PingFederate, designing SSO/MFA flows and resolving critical incidents through root-cause analysis.

SKILLS AND CERTIFICATIONS

Product Strategy, Roadmapping, User Research, PRD, Prototyping, Prioritization, Analytics, Go-to-Market, Pricing, Stakeholder Management, IAM, Active Directory, LDAP, Entra ID, Ping Identity, RADIUS, SAML, OIDC, OAuth 2.0, FIDO2, PKI/X.509, SSO, MFA, Zero Trust, Network Security, AI Agents, IGA, Least Privilege, JIT Access, Secrets Management, API Security, Delinea, Saviynt, AWS, Azure, SQL, Python, Tableau, Power BI, Figma, Azure DevOps

PROJECTS

NERD HERD | Dartmouth - Conrades Fellowship Top Finalist ***Feb 2024***

- Ideated and wireframed an AI-powered community platform; developed the business model and GTM strategy, and pitched it to a jury.

SAP AMERICA, INC., Pennsylvania, USA | **Platforms Strategy Consultant** ***Sept 2024***

- Formulating a strategy to centralize community engagement within SAP Experience Garage, across 23000+ SAP employees.

EQUITUS.AI, Clearwater, USA | **Data Analyst** ***Mar 2024***

- Led fine-tuning of pretrained LLM with LangChain framework, developing an agent translating natural language into SPARQL queries.
